THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 293 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 293 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

This action is in response to the reply filed on April 14, 2010

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: In regards to Claims 1 and 24, the prior art alone and in combination does not appropriately disclose a security paper with a security element at least partially embedded in the security paper where the cover layer applied to a carrier film has gaps in the forms of characters or patterns with information digitally printed therein. The information within the gaps further being of a different content from the gaps and the printed character contour conveys information different from what is conveyed by the contour of the gaps. Additionally the characters or patterns conveyed by the gaps is different is different from the digitally printed information within the gaps.

In regards to Claims 1, Burchard security element comprising a cover layer 4 having gaps 5 in the form of characters (letters) or patterns forming visually and/or machine readable first information (Column 5, Lines 9 – 15, 21 – 25; Figure 7, Items 4, 5), wherein a printed image 8 in the form of letters, numbers or geometrical figures forming visually and/or machine readable second information is disposed within the gaps in register (Column 5, Lines 21 – 25; Figure 7, Item 8 shows letters) and furthermore wherein the security element is a security thread (Column 4, Lines 26 – 29) and further wherein the content of the second information within the gaps is different from the content first information of the respective gap within which the second information is disposed (Figure 7 shows the first information as the gaps of letters "P"

and "L" and Column 5, Lines 21 - 25 teaches of the printing 8 being capable of being inside the first information. However, earlier in the patent in Column 4, Lines 39 - 47 the printing 8 separate from the gaps is taught can have **any** desired color design such as patterns of a flag and this would also have a different content as the first information is just negative writing where the second is positive along with additional information. The flag pattern is a different information than the mere indicia, the printing in the gaps provides an information that is the same but a second information of the flag that is different from the first information where the second information is within the gaps of the first information. Furthermore Column 4, Lines 36 - 47 teach of the same layers and inks as in Column 5, Lines 20 - 24 and the only difference in the embodiments is the location of the printing 8 and therefore the color design can inherently be used in this embodiment), and further wherein the form of the letters, numbers or geometrical figures forming the second information is different from the form of the characters or patterns forming the first information (The physical form of the letters in the second information are different because not only is it a positive image in the first information negative image, but it is also comprised of various different lines or colored portions which shows distinct physical patterns in forming the letters, number or geometrical figures of the second information).

Burchard is clearly disclosing a contour that is the same and the difference is the colors printed within the gaps. The printed information is different from that of what the gaps show because of the color possibilities, however, the contours are not taught to be different in any respect.

Hermann is used to cure this deficiency since Hermann teaches of a security document having a security thread wherein the thread is provided with a first information provided as a geometrically shaped window 4 which is provided with a micro-printing 12 within the window which has a different shape from the first information (Column 6, Lines 45 – 52 and Figures 1 & 2, Item 4; Column 7, Lines 23 – 38 and Figures 1 & 2, Item 12). It was stated that it would have been obvious to a person having ordinary skill in the art at the time the invention was made to use the teachings of micro-printing in openings in order to provide a well known alternative to printing within gaps in security threads.

Hermann shows indicia 12 being placed inside of an opening, however, this opening is an opening in the substrate and not something provided in a layer. The substrate is totally removed and then a foil 5 is adhered to a top surface of a security paper and this foil contains a micro-printing. This is one deficiency with respect to the amendment as the security element of Hermann having the microprinting is not embedded and the security element is not provided with this microprinting in a cover layer's openings. Hermann's microprinting is provided on a flat substrate which happens to be placed into a gap. There is no printing done within a gap of a layer of an embedded item. Therefore upon amendment the prior art of Hermann is not proper in modifying Burchard because Burchard is an embedded element with openings and an element of Hermann cannot be merely placed into these openings due to the construction of Hermann's foil 5. Furthermore, Hermann does not provide any disclosure of the capability of the microprinting to be placed into a particular opening the

size to that of Burchard's (Column 3, Lines 29 – 40 teach that the width of the thread is 150 microns wide with a type height of 1mm). Burchard is clearly disclosing printing matching the contours of the gaps and Hermann does not provide sufficient disclosure to show Burchard can be printed with different contours.

Heim, Schmitz, Kaule, and Sakamoto do not cure this deficiency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
